

## 061817 Are We Nearing Civil War?

Pat,

It is in my opinion that we have been in an Civil War for decades. What is called the “ The Deep State”, in my mind, resides one ocean plus one sea away from DC. Every President after Nixon, catered to that State, and at an unaccountable and unexplainable cost in U.S. lives, U.S. relationships with our allies, U.S. dollars spent, and the U.S. tragic weakening of the United Nations. Of course the Civil War waged, was hidden from the American people using the same tactics that was used by the Communist North Koreans on our Prisoners of War during the Korean Conflict. That being Brain Washing. A rather simple process, but very time consuming. Thus the requirement for the decades of this waged Civil War against our civil rights and our Founding Father’s values. Again, a very simple process of having the same message delivered consistently through Our Courts, Our Print Media, Our Movie Theaters, Our FCC licensed TV News, including Fox, Our Advertising industry, and the most influential and damaging one, Our Education System. Basically “Brain Washing” changes an individual’s inherited values, to their captor’s values. The genius of “Brain Washing” is, that it has a specific goal or goals and the deception is masked by allowing some inconsequential inherited values to remain. In the Deep State’s version, it is used to deceive individuals into thinking that they have all the information required based on being exposed to the same messages from all available sources to make a political decision when they vote to elect our leaders. The Civil War is so effective that the American voters are convinced that their democracy is working. The Deep State was ecstatic in the 2016 election, in that they were to get either Bernie Sanders or Hillary Clinton and with either one of these individuals, their final battles against the rest of their enemies would be waged. But it was not to be. To be was Donald Trump, but not just Trump. For at his side courts Steve Bannon, the arch enemy of the Deep State. And by this arrangement, brings the Deep State’s fruits, granted by decades of Civil War, visible in the swamp, and into the sights of “We The People” that voted for the Movement that Trump led. Unfortunately for America, the Deep State’s Civil War on us has been so effective, a majority of American voters have no clue of its existence, and voted for Hillary. While the rest of the Western World, strike out the UK, is totally aware that our Master’s policies is any enemy of the Deep State has to be an enemy of the United States. As Such and dutifully so, our Senators do as they are told, and vote 98 to 2 to increase sanctions against Russia and Iran. We the voters that believed Trump’s promises to negotiate friendships and get us out of the Middle East since he controlled all Branches of Government, found that his republican majorities failed him because they too were harnessed in the Deep State’s stables. Instead of negotiating peace with the world, our leaders by their vote, put us further into Harm’s Way and on a path to a possible nuclear war and our Flowering Youth will die for a cause that is not their own. The sad part of all of this is, that the real casualties of this “out of the closet”, Civil War is our Freedom, and the once great City upon a Hill, that once was The Light of the World.
