

## 06292018 Response to Pat Buchanan's No Party for Old White Men?

Ocasio-Cortez ran as a person of color, also as a woman, also as a Bernie Sander's clone. Throw in George Soros's money, and Hollywood's love fest with immorality, and all this adds up to the new democratic party. Or is it the new democratic party? I think not. This is a totally different revolutionary party that the ultra-busy American Citizen, has no idea exists. This party got its beginning starting with the Civil rights act of 1964. Does anyone remember that, that act was supposed to help struggling black family fathers get jobs by passing a law against discriminating against minority black males? What happened with that law was that by some fuzzy math, woman who were over 50% of the general population, were also considered minorities. So as the law went into effect, if companies like UPS or FedEx wanted to hire drivers, they had a choice, Black Males or White Woman. The result? If you have the time to look out your window to see who is delivering your packages, you will see more white woman then black males. So what return did we get on that investment? Very few black fathers were helped and now we have 70% of black families without a father in the home. OK so now we tried the 1968 War on Poverty law, which turned into a large group of people expecting the gift of succeeding in our society, without the need to earn that gift. It created what I call "The PPPP". The Professional Poor People's Party. Now giving the opportunity of the privilege of their constitutional right to vote, and you flood a district with these likeminded people, you will get a Ocasio-Corte. Her platform? Demand we give the PPPP more. So a house seat was won against a traditional first generation white family man. Ignoring the fact that he nor his legal migrated parents had any laws such as the 1964 or the 1968 gift acts, and he ascended, by himself, and won his house seat by working hard for the people of his district. Evidently by the victory of a Ocasio-Cortez, now it is not the way one should do it. The New Revolutionary Party of a Ocasio-Corte now exist and was born by the above two laws which should have been judged totally unconstitutional by a real law abiding constitutional minded Supreme Court but they were not judged that way. Streaming across our borders are more members of the PPPP. While we the American people sit on our butts not demanding that people coming into this country have to come here for opportunities not hand-outs and need to assimilate into our society and adopt our language and our constitution. Yet it appears that we are too busy to discuss real politics and real religion. Both as I see it our founding fathers constitutionalized stating that you cannot have one without the other. The outcome for us by being too busy and not getting involved, is to look at a good model of what could happen to America. That being the Peasant Uprising against the Russian Czars' government in 1917 and the beginning of a socialistic, communist government. But you are too busy to read this and who am I to judge you.
