

Pat,

The leftist liberals, as they are turning out to be, is the new Democratic Party. Almost in unison they are calling out for the abolishment of ICE. What is ICE? It is the agency responsible for Immigration and Customs Enforcement. i.e. they be the folks that keep us a country. How? They protect us from people with epidemic diseases, illicit drugs, criminals, murderers, terrorist, and everyone else who could care less to assimilate to our way of life or abide by our constitution. Abolish ICE and you have open borders with the above referenced abusers flooding in. The democrat's leaders know this and to them they do not see a need to protect us folks from epidemic diseases, illicit drugs dealers, criminals, murderers, terrorist, etc., for what they see, is democratic voters and their path to take over our country. But wait, if they indeed are successful, what will they do with these people. The majority of illegals crossing our border have no skills. Sure they can pull a democratic lever, but what else can they do? For the most part they will become wards of the government. Which means those of us that earn money by working hard and paying taxes will have to pay more taxes to support these people. How is that going to work out? Well we do have examples. Let's look at the liberal States and see how leftist democrats are running them. I will use Connecticut since I grew up there. Take a look at the old movies from 1930s and 40s and 50s. They always depict Connecticut as safe, clean, beautiful place to go to, and speaking from experience, it was. Now take a look at Connecticut today. The once great cities of Hartford, New Haven, and Bridgeport now all rank high for the highest crime rates in the country. Each city is on the verge of bankruptcy. They are sanctuary cities that have no money in a sanctuary state that has no money. And that State has one of the highest rates of welfare in the country and are high up in the charts with the highest taxes in the country. So what are the Connecticut tax payers doing about paying for all these people? Well, to be perfectly frank, they are leaving. Connecticut has lost a congressional seat and is on the verge of losing another one. It is a pretty simple calculation. Punish workers by overtaxing them to pay for people that will not or cannot support themselves, and the workers will leave. Now if the leftist democrats are successful in taking over this country and making the whole country a Connecticut clone, they will need to close the country's exit borders. This is because we, the hard working people of America, will leave. Just like those from the once great Constitutional State of Connecticut left Connecticut. And we will fear not, since there isn't a capitalistic country in the world that wouldn't welcome us. After all, we are, for the most part, the families of immigrants and migrating to a new country for opportunities is not new with us. We succeeded here and America was better for it. We can do it for another welcoming country. Ponder this! Who will welcome America's destroyers?
