

A Trump Doctrine — 'America First'

Pat,

You would make a Great Secretary of State in the Trump Administration. Barring you or someone who thinks like you, you will need to become the leader of the "Take Back America" revolution that will surely happen after the bomb is dropped on us in retaliation for our immoral global interventions. The present owners of America will not go down without a fight. Soros will turn to airplanes instead of busses to get the college brainwashed, illiterate, Snowflakes, to liberal cities to create havoc. Chicago, LA, and San Francisco, will import more illegals into their cities in defiance, and in your face, of federal Law. The Lesley Stahl's of the media will continue to report the miss-steps of the Trump Administration withholding their successes. The exiting Hollywood celebrities will not leave, since they left our country and our way of life years ago, but will stay. They will continue to take their enormous pieces of silver from their masters, continue selling their souls, and using their master's owned media to denounce any America First policy. The People have spoken in a peaceful democratic election to change the direction of our country and they won. They legally won. God help the liberals and their Masters. If this peaceful transition is sabotaged and a revolution must come to "Take Back America". Judging mankind's past behavior, in these types of rebellions, from Rome, to Russia, to Germany, to China, it won't be a pretty one. God bless you Pat. If anyone doubts that you are a true Patriot and worthy of praise, let them leave their American Passport behind and take the next plane out to the free and democratic island of Cuba.
