Is Islamic Terror America's Future?

Pat,

I agree with the premise that this generation will not likely see an end to Islamic Terrorism. However is it not the "We" contributing somewhat to our own demise? Seeds dropped on unfertile ground will not produce a harvest. Since the late 1960s the "We" basically walked away from God's laws. They found that the Torch that Kennedy stated was to be passed onto a new generation, to be too hot to handle. The sixties generation preferred not to follow the stability and order of our great society that was imbedded in their parents and every other generation of parents that proceeded them. No! they chose to Make Love, not War with the exception of War on God and God's laws. When we were "One nation under God" seeds could never find fertile ground to sprout even a weed, much less a harvest.

.
