

Do you remember how we celebrated when the people of Afghanistan and Iraq proudly displayed their purple-stained fingers, our equivalent to "I Voted" stickers? But there was a huge difference: The Afghans and the Iraqis took their lives in their own hands as they defied the Taliban's and Isis's death threats for voting in a free election. This example should show the whole world how important it is to vote in a free election. But for the Afghans and the Iraqis to risk their lives to vote, they needed, and had faith, that their votes, and only their votes, would be counted.

I cannot honestly say that my legal vote in the past election, even though I was given an "I Voted" sticker was not negated by at least one illegal vote. You do not have to be a Mathematician or a Vegas Odds Shark to find enough anomalies in the November 3rd, 2020 Presidential Election to question the results, and with that, enter into a detailed investigation. As of this date, there has not been one that actually looks at all the votes cast both in-person, by mail, and by machine tabulations. In a free country the right to vote is the cornerstone of any democracy. It is the Sanctity of the ballot that makes us a free country. It is that imperative that every elected official should make absolutely sure that only legal votes are counted. Again I do not see that happening. I do not see my elected federal representatives executing any investigations or calling for any investigations. I do not see my State or any other State's elected representatives executing investigations or calling for investigations. It appears to me, our officials are content to let this possible illegality pass. Without the Integrity of a legal voting system, we do not have a democracy. And without this, we could be experiencing "Taxation without Representation". Something our founders found sacred enough, that they fought and died for in their pursuing our independence from England. Not only did our revolutionaries die to give us this freedom, many other brave soldiers throughout the centuries died to keep this freedom. If we are not going to investigate the obvious possible abuse of our most sacred freedom, that of one vote per one citizen, then we do not deserve the sacrifices of all those people that died in battles here, and across the globe, so we can retain this cherished hard fought freedom. So if we let these obvious abnormalities go without a full investigation that will guarantee that our voting system is trust worthy, than it would be problematic to call ourselves a free nation. If none of those in power takes on this cause, then why honor those that died for our country. So why not just plow over Arlington Cemetery and use the property for Affordable Housing, or plow over the burial grounds at Gettysburg and make it Recreational Park, or give permission to the French Government to plow over the 6000+ American Soldiers graves that died at Normandy and build a Seashore Resort for themselves. All of the above all are sacred grounds. Only because our people and our politicians were willing to risk life and liberty deeming these to be the right battles to fight in defense of our freedom.

This letter is not a request for any elected official to die for his country, I am only asking for them to do the job the people elected them to do. It is an honorable appeal, to honorable people, to do what is right for our country.
